SIMPLEX DATA SOLUTIONS LLC

The professionals of Simplex Data Solutions are very much aware of the demands placed on government and industry by the continuous change in today's technological environment. Government agencies are under constant pressure to maintain their operational readiness to support mission requirements, while funding shortfalls require agencies to prioritize which vulnerabilities will be mitigated and which will be deferred. Private industry faces these same obstacles. Like government, it is impacted by computer hacking and industrial espionage. Therefore, **Information Security must be a top concern!** Simplex Data Solutions has the capability to reduce your Information Assurance efforts, enabling you to continue planning for the future while we assist you in fulfilling your security needs. Our commitment is to provide skilled professionals who will focus specifically on the Certification and Accreditation of your systems and

Information Assurance Consulting

infrastructure, to ensure compliance with regulatory security programs.

Our team will be with you every step of the way!
